1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a **single paragraph** on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "**said**," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over JAWANDA in U. S. Patent No. 6,243,581 in view of CLARK in U.S. Patent No. 5,960,074.

JAWANDA discloses a wireless local area network communications system, comprising a wireless electronic communication device (16), a wireless local area network unit (14), and a

Art Unit: 2665

plurality of electronic devices (68, 70, 72) interconnected via a wired bus (60), to provide voice and/or data connection between a wireless wide area network (10) and a wireless local area network (12) (col. 2, line 42 to col. 3, line 65, col. 4, line 20 to col. 6, line 10) as in claims 1-5.

JAWANDA fails to disclose the feature of having the wireless local area network communications system operated inside a vehicle or its proximity, which is well known in the art and commonly applied in mobile tele-computer network environment.

CLARK, for example, from the similar field of endeavor, teaches the utilization of a wireless local area network unit (103A, 103B) inside a vehicle to provide data communication between a wireless wide area network and a wireless local area network (col. 2, line 40 to col. 3, line 31, col. 3, line 40 to col. 5, line 59), which can be easily adopted by one of ordinary skill in the art into the system of JAWANDA, to provide wireless communication system with mobility to further enhance the system capability and performance.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Mahany et al., Clark '655 and Pounds et al. are all cited to show the feature of data communications between wireless WAN and wireless LAN utilizing mobile/base station or vehicle similar to the claimed invention.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alpus H. Hsu whose telephone number is (703)305-4377. The examiner can normally be reached on M-F (5:30-3:00) First Friday Off.

Art Unit: 2665

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Huy D. Vu can be reached on (703)308-6602. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703)305-4700.
